OBJECTIVE

Motivated individual looking for a job as an entry-level employee at a well-known company where I can put my technical skills and experience solving problems to work. I am also eager to learn more through continuous learning opportunities and contribute to an organization's success while developing myself as a professional.

EDUCATION

B.Tech. Artificial Intelligence and Data Science

Dr. N.G.P. Institute of Technology, Coimbatore

Expected Graduation: 2027

CGPA: 9.47 / 10 (Sem 6)

Higher Secondary Certificate (CBSE)

Orison Academy, Coimbatore

Graduated: 2023

Score: 82.6%

Secondary School Certificate (CBSE)

Orison Academy, Coimbatore

Graduated: 2021

Score: 87.4%

PROJECTS

SmartData — AI-Powered Smart Data Platform | React.js, FastAPI, MySQL, Python, Scikit-learn

Jan 2026

- Shipped an end-to-end AI platform for dataset profiling, automated data cleaning, SQL warehouse integration, and predictive analytics – built solo from backend to UI.
- Built JWT-based authentication, role-based access control, an NLP-to-SQL chatbot, interactive BI dashboards, and automated PDF report generation, integrating REST APIs across the stack.

Mini ERP System – From Demand to Delivery | ReactJS, FastAPI, PostgreSQL, Python

June 2026

- Developed a centralized, production-style ERP system to manage product, inventory, sales, purchase, and manufacturing operations through a unified platform; selected as a Finalist at the Odoo × KAHE Hackathon.
- Implemented Bill of Materials (BoM), procurement automation, and real-time inventory tracking via REST APIs to streamline end-to-end demand-to-delivery workflows.
- Designed a modular, PostgreSQL-backed architecture that improved operational visibility, optimized business processes, and reduced manual effort.

Financial News Summarization using NLP | Python, NLP, Machine Learning

March 2026

- Built an NLP-based summarization pipeline to turn lengthy financial articles and reports into concise, automatically generated summaries.
- Implemented text preprocessing including tokenization, stop-word removal, and vectorization for efficient language analysis.
- Applied NLP models to surface key insights and improve readability of financial content.

Global Natural Disaster Data Analysis & Visualization | Python, Data Analytics, Matplotlib, Pandas

April 2026

- Analyzed global natural disaster datasets to identify patterns, frequency trends, and regional impact distributions.
- Performed data cleaning, preprocessing, and exploratory data analysis using Pandas and NumPy.
- Created insightful visualizations and comparative trend analysis using Matplotlib and Seaborn.

Hybrid Stock Price Prediction | Python, Machine Learning, LSTM, XGBoost

March 2025

- Developed a hybrid forecasting system combining LSTM and XGBoost models to improve short-term stock price prediction accuracy.
- Engineered technical indicators including SMA, EMA, RSI, and MACD using historical stock market data.
- Visualized stock trends and prediction outputs using Matplotlib and Plotly for better interpretability.

INTERNSHIPS

Thiranex	Remote
<i>Data Analytics Intern</i>	<i>Jun 2026 – Jul 2026 — 1 Month</i>
- Built Power BI dashboards and performed customer segmentation using Python, Pandas, Scikit-learn, and SQL to derive business insights. - Developed predictive analytics models and automated data cleaning workflows to improve reporting accuracy and efficiency.	
Accent TechnoSoft	Coimbatore, India
<i>Full Stack React Intern</i>	<i>June 2025 — 15-Day Internship</i>
- Developed responsive web interfaces using ReactJS, reusable components, React Router, and Hooks for improved user experience. - Integrated REST APIs and managed source code using Git and GitHub following industry development practices.	

SKILLS

Programming Languages:	Python, Java, SQL, JavaScript, HTML, CSS
Backend & APIs:	FastAPI, REST APIs, JWT Authentication
AI / ML:	Scikit-learn, NLP, LLM-based chatbots, LSTM, XGBoost
Data Visualization & BI:	Power BI, Matplotlib, Plotly, Seaborn
Databases:	PostgreSQL, MySQL
Data Processing:	Pandas, NumPy, Data Cleaning
Tools & Frameworks:	Jupyter Notebook, Git, GitHub, React.js

AREAS OF INTEREST

- Product Engineering & Full-Stack Development	- Large Language Models
- Artificial Intelligence	- Machine Learning
- Natural Language Processing	- Database Management Systems

CERTIFICATIONS

- Human Computer Interaction (Elite + Gold) – NPTEL	Jan 2025 – Apr 2025
Learned usability engineering, user-centered design principles, UX evaluation metrics, and accessibility-focused interface development.	
- Introduction to Internet of Things (Elite + Silver) – NPTEL	Jan 2025 – Apr 2025
Explored IoT architecture, MQTT/CoAP protocols, and real-world IoT applications.	

CO-CURRICULAR ACTIVITIES

- National Paper Presentation – PSG College of Technology & CIT	2025
Presented a technical paper entitled on AI-powered Stock Price Prediction project at a national-level symposium.	
- Odoo x KAHE Hackathon – Karpagam Academy of Higher Education	2026
Selected as a Finalist for building and shipping a Mini ERP System – From Demand to Delivery in a time-boxed hackathon sprint.	

ACHIEVEMENTS & ACTIVITIES

- Best Paper Award – KPR Institute of Engineering and Technology	2024
Received the Best Paper Award for presenting research on sustainable corrosion inhibitors.	
- First Prize – Paper Presentation – Rathinam Technical Campus	2024
Won First Prize for presenting a research paper in the domain of agriculture.	
- Academic Excellence – Dr. N.G.P. Institute of Technology	AY 2024–25, AY 2025–26
Recognized as Class Topper for two consecutive academic years.	
- Vice President – Alzenixx – Dr. N.G.P. Institute of Technology	2025
Coordinated technical events, student activities, and mentorship initiatives.
